

# Our Wonderful World

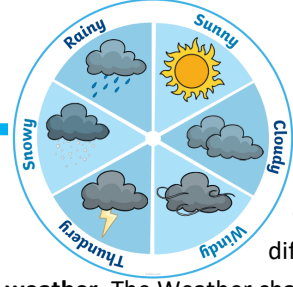

Different parts of the world have different **climates**. Some countries are hot and rainy nearly every day. Some countries are very cold. The weather can also depend on the time of year.

Our school is in a village called **Conisbrough**, which is in a town called **Doncaster**, which is in a country called **England**. England is part of the **United Kingdom**. We live on the planet Earth.

**Houses** are different around the world, depending on different cultures, climates and needs. Houses come in all sorts of shapes and sizes and they are built from different materials.

In England we experience lots of different types of **weather**. The Weather changes at different times of the year. Although we could have rain, sun, snow and wind all on the same day. different times of the year.

The **physical characteristics** of a place make up its natural environment. Things such as bodies of water, animal life and climate can make one location different to another.

We can help to **look after the planet** by doing different things such as recycling, saving water and making sure we put our rubbish in the bin.
